Overview

Overview

Van Lang University's assignment website is a convenient place to manage lecturers' work, providing a statistical system on lecturers' activities, helping users have an overview of each individual during the course. teaching program.

The background features abstract, rounded organic shapes in various colors: a large dark teal shape on the left, several orange shapes of different sizes scattered across the middle and bottom, and a small green shape at the bottom left.

Software testing

Software testing

1. Planning: Make a plan for team to base on and working
2. Analysis: Analysis Test Requirement
3. Design: Build Functional & Integration Testcase
4. Implementation: Automated Test Scripts
5. Execution: Execute test cases and record them
6. Completion: Write summary report
7. Monitoring & Control: Ensure work goes according to plan & achieves set goals
